This wikiHow teaches you how to clear your browser's cookie cache. Cookies are pieces of saved data in your browser that help inform the content you see, such as ads, certain webpage text, and autofill information.

Method 1 Chrome on Desktop

- 1 **Open Google Chrome.** It's a red, yellow, green, and blue circular icon.
- 2 **Click** . You'll see this icon in the top-right corner of the Chrome browser.
- 3 **Click** . It's near the bottom of the drop-down menu.
- 4 **Scroll down and click** . This link is at the bottom of the page.
- 5 **Click** . You'll see this option below the "Privacy" heading.
- 6 **Make sure the "Cookies and other site and plugin data" box is checked.** You can uncheck every other box on this page if you like, but the "Cookies and other site and plugin data" box must be checked.
- 7 **Make sure**  **is selected.** In the box near the top of the window, you'll see a box with a time span (e.g., "the past hour") listed. If this box doesn't display the "the beginning of time" option, click the box and then select it.
- 8 **Click** . It's in the bottom-right corner of the window. Doing so will remove all of your browser's cookies.

Method 2 Chrome on Mobile

- 1 **Open Google Chrome.** This app is white with the Google Chrome icon on it.
- 2 **Tap** . It's in the top-right corner of the screen.
- 3 **Tap** . This option is at the bottom of the drop-down menu.
- 4 **Tap** . It's in the "Advanced" section of options near the bottom of the page.
- 5 **Tap** . It's the last option on this page.
- 6 **Make sure**  **is checked.** You can uncheck every other item on the Clear Browsing Data page if you like, but this option must be checked in order to clear your browser's cookies.
- 7 **Tap** . It's the red-text button below the browsing data area.

8 Tap **Clear Browsing Data** when prompted. Doing so will delete your Chrome browser's mobile cookies.
